The Project O team held their 24 hour Colourathon on Friday 20 May. The event was an amazing success. I believe they raised over $12,000, which was more than double the amount they aimed for. This money will go towards toys for children who are in women’s shelters as a result of domestic violence. This event has been an amazing opportunity for the most authentic of learnings for the group and for Wynyard High. We are extremely proud of their efforts. This just shows what can be achieved when people work together. Thanks to Lix and Elspeth from bighART for their leadership with the group.

Last week was our cross country. Once again there was lots of participation, and there were many parents who made time to come along to watch. Thank you to those parents. We value your attendance here at these events. After each race, students received an icy pole and a water drink to aid their recovery. A prize and presentation assembly was held at the end of the day with several random prizes given. The winners, runners up and the inter-high team were announced and Austin was named the top house. It was a really great day; brilliantly organised by Mr Hampton and Mr Pieremont.

Work Inspirations has started. Last week 9B went out to visit businesses and industry to learn more about the world of work, and to discover more about the people who lead these businesses’ journeys. I was fortunate to attend their presentations on Thursday with Senator Jacqui Lambie. This week 9C have been out and about and next week 9A have their turn. This is a terrific opportunity for students to learn about their town, and for businesses to learn more about our teenagers. The feedback I received from the adults involved last week was excellent.

This week some of our students attended the university campus in Launceston. The trip was designed to show students some of the different courses available. Marine Science, Engineering and Psychology were some of the offerings.

The plain clothes day fundraiser for Logan Shepherd was a great success. The SEC raised $244 to go towards this very worthy cause.

Four of our students attended a Rotary Leadership camp last weekend. From all reports the weekend was excellent.

Teachers are busy writing reports at the moment. These will be sent out at the end of the term.

A reminder about the appropriate use of ICT. This week I have included a fact sheet on “Managing your Reputation”. Please take the time to look at it and remind your child about the importance of keeping safe when using ICT. Mobile Phones are part of the ICT umbrella and must be used appropriately. While students are allowed to bring their phones to school, they are not to be used in class unless the student is given permission from the teacher as part of their learning. If students are not able to meet this expectation then their phone will be taken to the office and can be collected at the end of the day.
Well done to the Project O girls on their massive effort in raising over $12000. With the initial goal of $6000 reached, the girls set their sights on doubling this target which would enable them to reach even more children in more shelters. Thanks to their effort, and the generosity of all who donated, this goal was exceeded.

Beyond the school gate sessions are heading to a region near you.

Beyond the School Gate provides students, their parents, teaching and support staff with information about the available post school options in their local region. Attendees will hear an overview of the options and services available and also have a chance to talk with providers.

**North West:**
Devonport Don College  Wednesday 8 June  5.30 pm - 7.30 pm
Hellyer College, Burnie, Tuesday 21 June  5.30 pm - 7.30 pm

**North:**
Newstead College, Launceston  Tuesday 28 June  5.30 pm - 7.30 pm

**South:**
Guilford Young College, Glenorchy Campus, Bosco Centre Friday 17 June  10.00 am - 12.00 pm
Rosny College Thursday 23 June  12.00 pm - 2.00 pm
TasTAFE Library Tuesday 28 June  5.30 pm - 7.30 pm

Career and Life Planning – My Education

Our children are facing a future with many opportunities and challenges. The workplace is constantly changing and individuals need to be more flexible in the creation and development of their own life story.

Careers are no longer defined as ‘jobs’, but as all activities that will influence future roles during the course of a lifetime.

The world our young people are growing up in is rapidly changing and evolving, where jobs are less secure and many future jobs are unknown.

Future workers will change employment more often and work in a range of industry areas. Attitude, Skills and Knowledge are the factors determining a person’s employability, and the main factors determining business employment decisions.

Successful employers recruit for Attitude and will train and educate for Skills and Knowledge.

For these reasons, schools are introducing a more modern and effective approach to career education and planning in order to ensure students are well prepared for their future.

What is My Education?

My Education is a coordinated whole-school approach to career and life planning commencing in Kindergarten. As parents and carers, you are encouraged to be actively involved and engaged with this approach as it will become a key part of your child's education.

ME Online

A component of My Education will be an online career planning system, (ME Online) which will identify your child's interests and strengths throughout their education, and align these to course options and possible employment opportunities, helping to guide them towards a successful future.

Business and Industry

My Education is a partnership between students, parents and carers, the school and the community. Students can learn so much from real-world business and industry experiences, and My Education links education with our students’ future employment options and training opportunities. This will ensure that our young people are job-ready, resilient and employable.

What's happening now?

For students in years 7-12:

- My Education is a key part of your child’s learning program for 2016
- Students will access ME Online during 2016
- Schools will continue to work with business and industry to provide authentic workplace learning opportunities

Teachers are being strongly supported through extensive Professional Learning for My Education.

For students in years K-6:

- Your child’s My Education journey will start in 2017
- There will be further information provided to you and your school’s teachers during this year.
Wynyard High School students recently participated in a project coordinated by the University of Tasmania which focused on ‘Innovations in Food’. Students were given the task of either designing a cheese platter for an Instagram page for Lion Dairy, or helping Mount Gnomon Farm market their farm tours.

Students were introduced to the concept of a ‘Food Experience’ and what it entailed. The majority of visitors who come to Tasmania wish to explore our food and wine experiences. During the introductory session, we asked students how they might be able to assist our industries market their products.

Wynyard High School students participated in an industry tour on Tuesday 3 May. They were given a short tour of Lion Dairy and spoke with Richard Glover (Workplace Safety), Alice Crawford (Food Technologist) and with Cheesemaker Jamie Bell. Richard gave the students an idea of what a professional cheese platter might look like and invited students to try some cheeses.

Following the Lion visit, we managed to quickly overcome the unscheduled bus breakdown as the bus company was lightning fast getting a replacement to us! We then headed east to Mount Gnomon Farm to visit Guy Robertson. Due to the terrible weather we were unable to do the farm tour as planned but Guy spoke about the future of Agri-Tourism and what it meant to be able to provide tourists with an experience of food from paddock to plate. He provided us with some tacos and sausages to try. This signalled the end of the industry tour and for the students, it was back to the classroom to start to develop their ideas further.

With some intense behind the scenes work from Mrs Moore, students were able to prepare and present some very professional cheese platters to a panel consisting of Jamie Bell from Lion and Brett Williams and Don Defenderfer from University of Tasmania. The panel was very impressed with the work that had gone into the platters. Adam Daniel had thought very carefully about how he might market Mount Gnomon farm tours to Chinese visitors and prepared a comprehensive list of things to remember. Danielle Smart, Bronte Marshall and Te Whaea McMillan all presented a brochure which they aimed to distribute to incoming visitors at the airport.

3D Printing and Digital Technologies

Late last year Wynyard High School purchased a 3D printer. The students in the Digital Technologies and Graphics and Design classes get a chance to design and print whatever their imagination can create.

Before you can print anything you have to design it in one of the two programs we have access to: Autodesk 123D Design, and Google SketchUp. Both programs allow us to design and create whatever we desire. The challenge is to learn how to use them.

When a design is finished print jobs can be “ordered” by submitting requests and files to a web database created by Mr Haberle. This web service allows us to share the printer around by sequencing print requests, documenting costs and publishing the work we produce. Trained students can then load the design files into the printing software and start the print job.

When the print job is first uploaded to the printer it is turned into layers. The printer heats a platform and begins to melt the plastic filament in the print nozzle. When the nozzle warms up enough, the print nozzle and head begin moving over the platform and laying down the molten plastic. The printer works on a layer process, building the object layer by layer. Some print jobs may have about 300-400 layers and can take several hours to finish.

A few students from these classes have already been hard at work creating all sorts of weird and wonderful things such as model DNA strands for Science class, a model for Maths class, a personalised iPod case and Logo designs for Graphics and Design.

Cameron Bambridge Year 9
Friday 27 May saw the running of our annual Cross Country carnival. In perfect autumn running conditions a large number of our students took up the challenge of running either our 4km or 5km course. With many chasing an elusive record or vying for a place in our Inter High team, the competition was fierce for the top 8 places; others were content to jog or walk the course and gain valuable house points for their houses.

All participants were awarded refreshments upon completion of the race and all competitors went in a random prize draw, where prizes of up to $50.00 were awarded. In the afternoon the activities continued. Students had a choice of a variety of team games and challenges. A special thanks to all competitors, staff and volunteers who made this day a success. We were very pleased with the participation rates this year. We hope to build upon it again next year.

Work Inspirations

All grade 9 students will be taking part in a Work Inspirations program as part of the Wynyard School Community Partnerships programme. This programme has been designed to offer a unique experience to Year 9 students and allow them to take a behind the scene look at a range of local workplaces.

As part of this experience, students will be basing themselves off campus at the Waratah Wynyard Council Chambers for the three day event and travelling to various workplaces on foot and by bus. During this programme the students will be discussing possible career pathways with a variety of local employees. Students will be attending Table Cape Primary School following their return to school to present their experience.

The outcome of this programme is to enable Grade 9 students to learn more about their own skills and preferences, workplaces practices and begin to navigate their future in the workplace. The work that the students complete during this time will be used as part of their assessment in the Australian Curriculum Work Studies course.
**From the Paddock**

By Lamb Chop

The Year 9 and 10 Agricultural Studies class has been working diligently on a range of projects including:

- Creating and storing our own compost in a way that is more sustainable in the long term
- Weeding our insanely huge garden (which is full of flowering plants thanks to Cloverlea Plants Plus)
- Growing winter vegetables and herbs such as broad beans and garlic in our high rise garden beds
- Locating, mapping and laying of vital irrigation lines and drinking stations for our livestock
- Caring for our sheep, lambs and chickens
- Replacing posts, gates and fencing
- Wood splitting and stacking, just to mention a few.

We were also successful in securing funding through a community grant offered by Fonterra, which we will be using in the upcoming wet and colder winter months when we begin renovations on our livestock holding and loading yard. Our sheep have begun lambing and we have been lucky enough to receive 6 healthy lambs. Students have been responsible for setting up stables for a fresh lamb and her mother, particularly as the nights have been so cold. Let’s hope they baaand together and snuggle up when sleeping out in the elements.

At present, the class is researching the possibility of sustainably growing mushrooms in unwanted coffee bean grounds.

9.30: Crt Supervisor – M.Heine Canteen – W Berry, M Willcox

CRT 4 (A3/4) MRC White v WHS Red C Woolnough

CRT 6 (A3/4) WHS Blue v MRC Blue A Woolnough - J Wise
Fact sheet
MANAGING YOUR REPUTATION

When you send something digitally, either via your mobile phone or over the internet, you lose control over who sees it and what they do with it. You may never be able to permanently delete the image or text, so it is important that before you send something, think about what you are sending and where it might end up.

Do you know who you are sending it to?
You might be tricked into thinking you are communicating with a friend, but can you ever be sure that it is only them holding the phone or looking at the screen?

Do you know what they will do with it?
Even if you are sure who is on the other end, can you really trust them? If your relationship turns sour, can you be sure that they won’t use that text or image against you?

Do you want it to be around forever?
Once you have shared something in a digital format, it can easily be distributed to others and posted on the internet. Distribution might start with just your school, but it can quickly spread to your community and beyond. Once you put something on the internet, it can never be permanently deleted. Think about these things before you ever share something digitally.

How will it affect your future?
A future employer, university or sporting organisation might research you online. What they find will influence their decision on whether to employ you.

Some pictures should never be shared. These include images in little or no clothing, or in sexualised poses.

What should you do if it has already occurred?
If you have received this type of material, delete it without forwarding it. Tell the person who sent it to you that you are not interested in being a part of this. If you know who the person in the image or communication is, let them know what is going on. They wouldn’t want to be the last to know.

If you have created this material, delete it and don’t share it. If you have sent it to someone, ask them to delete it and make sure they do.

If someone has created this material of you without your permission, you need to tell a trusted adult and they can assist you in reporting it to law enforcement. This is a serious matter and should not be ignored.

So what does the law say?
Images, text or representations of someone under the age of 18 in little or no clothing, a sexual pose or engaged in a sexual act may be considered child pornography.

Even if you create and share this content yourself you can still be breaking the law!

Young people in Australia and overseas have been charged under child pornography laws for engaging in this type of behaviour.

So what can you do about it?

Type your name into a search engine and see what’s out there about you. Regularly search for your name, username, email address and phone number in online search engines such as Google, Bing or Yahoo! You can also use meta search engines such as www.pipl.com for a deeper search. If you don’t like what is out there, take ownership and have it removed or balance it with positive content.

Your online reputation is your responsibility so take control of what your digital shadow is saying about you!

Working with Vulnerable People
If you volunteer at this Wynyard High School, you will be required to register for “Registration to Work with Vulnerable People”. This will be mandatory by 1 September 2016.

In July 2014 the Registration to Work with Vulnerable People Act 2013 commenced in Tasmania. This registration aims to significantly improve safeguards to help keep children safe from harm.

Please remember that because of the number of people applying that the timeframe will be approximately 6 weeks; so please register as soon as possible at Service Tasmania, and if you are a volunteer or working with the Education Department then DON’T PAY; the Education Department will cover the cost of your volunteer registration.

For any further enquiries, please contact Alison Willcox at Wynyard High School on 6442 2385.

School Magazines (Anunalka) are available at a cost of $5.00. The years we have available are 1962 through to 2012. If you are interested in a copy then please call into the school between 9am - 3pm. There are limited copies for some years; 1982 - 1987 are all gone, so get in quick!!!
